Sub Contract Type: Traditional

Size: 12,000 Sq ft

Integr8 successfully tendered and were awarded on a traditional build only basis; the mechanical & electrical services installation works for the refurbishment of the two storey Robins & Day Peugeot car dealership in Clapham. The fast track, project comprised the extension & major refurbishment of the existing dealership in accordance with the new Peugeot corporate "Blue Box" image. Integr8 undertook the M&E services works on the project including...

new lighting (corporate, non-corporate ,emergency escape & exit); containment and wire-ways for the clients data specialist; general & specialist power, inclusive of all final connections to plant/equipment; a new addressable fire alarm system; a BOSCHE public address & background music system. Integr8's innovative approach to the tender process resulted in the client being able to have a state of the art 3 pipe VRV air conditioning system for the new showroom and front of house offices for the same sort of price as the pre-designed conventional LPHW heating and DX cooling system. The refurbishment works also included a supply & extract ventilation system complete with a heat recovery recuperator for the showroom & office areas, along with new water services & sanitaryware to the newly re-configured WC's.
