

CLIENT / INFINITI / BIRMINGHAM

PROJECT TIMESCALE:
12 WEEKS

PROJECT SIZE:
1782.65M2

HIGHLIGHTS

This was Integr8's first project working alongside BDB Design & Build Ltd. We carried out their works to the design and requirements of the electrical consultant CAD 21. The Infiniti project was completed on time and delivered to a very high standard, which has resulted in BDB awarding integr8 further projects around the UK.

PROJECT TYPE

General Electrical Service's refurbishment to an old Nissan showroom;
The main area of work was carried out within the showroom and ground floor office's, the works consisted of new lighting & small power to showroom ground floor offices. Also within the workshop area alterations were made to the existing installation to accommodate the new plant deck and first floor access.

WORK CARRIED OUT

New lighting

- Corporate lighting to showroom and ground floor offices (front of house)
- Non corporate lighting to ground floor parts area, office and toilets (back of house)
- Emergency, Escape & Exit to all areas

Containment for:

- Data
- Power
- Fire Alarm
- General & Specialist power plant/equipment

We also made alterations to the existing fire alarm system to increase the coverage to an L2 system.
